

ADVANTAGES

- Solution for air-starved applications
- Capable of airflow up to 2400 cfm
- Available in efficiencies from 95% to 99.999% @ 0.3 micron. (95% units not tested)
- More media area lowers pressure drop and significantly increases the life of the filter
- Potted construction creates strong and robust filter pack

Application	Built-up filter banks, rooftops, split systems, free-standing units, package systems and air handlers in medical facilities, pharmaceuticals, and clean process manufacturing.
Frame	Extruded anodized aluminium
Gasket	Seamless PU foamed gasket
Media	Glass fiber
Recommended final pressure drop	2x Initial pressure drop
Max Temperature (°C)	79° C
Relative Humidity max	100%
Comment	95% to 99.999% at 0.3µ. Tested for global efficiency in accordance with IEST Recommended Practice for Testing HEPA Filters. UL 900. See Product Sheet for more details.
